

Eco-Friendly ID Pouches

We have multiple options for our environmentally friendly Mylar pouches. Our first option is a biodegradable pouch which is made from Corn Resin (PLA) – All the composite is corn. As the raw material, the corn is fermented to lactic acid, and then transformed into a high-performance polymer called polylactide, finally the corn resin is made from this polymer. Ultimately this product will decompose back to the earth and presents no environmental hazard.

(ECO66340) L 27/16" X W 31/2"

(ECO66341) L 31/2" X W 25/8"

Our second Eco-Friendly pouch is made without di-octyl phthalate (DOP) found in conventional pouches. This pouch is completely transparent.

(ECO66350) L 27/16" X W 31/2"

(ECO66351) L 31/2" X W 25/8"

Quantity	100	250	500	1000
Corn Resin (CAD)	\$0.60	\$0.55	\$0.50	\$0.45
DOP Pouch (CAD)	\$0.40	\$0.35	\$0.30	\$0.30
